Subject: FW: Mine footprint changes

Hi James,

Matthew Brody informed me you may have been working on the Pebble mine footprint scenario for EPA? Is that correct and do you have a current version of the Pebble footprint (TSF G, mine pit, and waste rock area)? I work with Dan Rinella at UAA and am helping on the fisheries part of the characterization and assessment.

Thanks, Becky

Subject: Mine footprint changes
Importance: High

Hi Phil and Matt,

I am going to make some maps for the risk assessment for Dan Rinella and he'd like me to show impacts on fish species from TSF G, the mine pit, and the waste rock area. I think there may have been an edit to TSF G (and maybe others) based on comments Phil received from the team. Did those get made? Is there an updated version of the mining area footprint that I could have?

Thanks, Becky
